Robex 17z-9A

Machine Walk-Around

Rugged Upper and Lower Frame

The upper frame is designed with an optimum structure to absorb high stress from outside. Reinforced box section center frame and track frame provide exceptional strength and longer service life to withstand the tough working conditions.

Compact design

R17Z-9A's compact design allows the operator to work in confined areas, like close to buildings on roadways, and in urban areas. R17Z-9A's variable undercarriage provides easy and efficient operation in any limited space work environment.

Engine Technology

The R17Z-9A is powered by a proven and reliable, Tier 4 certified KUBOTA D902 Engine. This engine provides efficient fuel combustion and reduced noise.

Efficient Control System

Control devices are all conveniently located for improved operator comfort and productivity. A safety lever on the left-side console is designed to prevent exiting the cab while hydraulic controls are live.

Advanced Hydraulic System

The R17Z-9A hydraulic system is precision designed for fast operation with fine control capabilities.

Comfortable and Durable Cab with Canopy

Canopy frames meet international standards TOPS, ROPS, FOPS, FOG ensuring operator's safety.

Operator Convenience

An adjustable suspension seat, wrist rests, ergonomically designed joysticks and plenty of leg room help to reduce operator fatigue. An array of indicators and gauges are displayed on the monitor which keep the operator aware of machine performance at all times. The monitoring system includes seven warning indicators, water temperature gauge, fuel gauge and hour meter.

Easy and Simple Maintenance

The R17Z-9A is equipped with wide opening engine hood for easy access and maintenance. Additional benefits include an easily serviceable air cleaner and centralized grease fittings.

Extended Life of Components

The R17Z-9A reduces operating costs over time with long life hydraulic oil, shims and bushings.

Preference

An operator, who sets his machine to his needs, takes pleasure in his work. Operators can fully customize their work environment and operating preferences to fit their individual needs.

*Photo may include optional equipment.

OLED Display & ESL Function (Engine Start Limit)

The OLED display is placed to depict the followings: hour meter, oil pressure, battery charge, engine coolant temperature and a fuel gauge. Theft Prevention Function is added.

Concentrated Controller Position

The left and right control levers are ergonomically located for convenient access. Pilot operated hand levers are easily accessible for controlling the dozer blade and track extension. Easy-to-access control switches on the left side console improve operating comfort and productivity.

A tiltable left-side console allows the operator easier access to the cab. A safety lock system is designed to prevent exiting the cab while hydraulic controls are live. When the safety lever and left side console are positioned upright, hydraulic functions are disengaged.

Emergency Stop Switch

At the event of an emergency, engines shutdown.

Two Outlet Sockets

Sockets may be used for multiple purposes.

Operator Comfort

An operator's work environment should be stress free. Hyundai R17Z-9A's adjustable suspension seat, wrist rests, ergonomically designed joysticks and plenty of space help to reduce stress on the operator.

Front Guard with the Foot Rest

The cross pipe is placed for front guard reinforcement. Also, an operator may use it as a foot rest.

Precision

New technologies designed to improve performance and precision, make the R17Z-9A smooth, fast and easy to control.

Boom Swing (LH : 70° RH : 54°)

The R17Z-9A's boom swing function is designed for efficient work in congested residential and urban areas. The boom can be offset left or right within an operating range.

Zero-Tail Swing

The Zero-tail swing excavator allows you greater flexibility when working in narrow urban areas from an alley and indoor to residential and small gardens.

Structure Strength

The R17Z-9A canopy structure has been fitted with stronger but slimmer tubing for added safety and improved visibility. Low-stress, high strength steel is integrally welded to form a stronger, more durable upper and lower frame. Structural integrity was tested by rear machine test and long-term durability tests.

Variable Undercarriage

The R17Z-9A's track width adjusts to between 990 mm ~ 1,300 mm (3'3"~ 4'3"). The operator can easily adjust the blade size by removing the pin. Specially designed rubber-padded track shoes protect the road surface.

Kubota D902

Emissions: The most compact multi-cylinder liquid cooled industrial diesel engines comply with EPA Tier 4 Emission regulations without additional After Treatment Tools. This engine meets standards over the NRTC and NTE requirements.

Lower Noise Level: The half-float valve cover and MoS₂ coated piston reduce noise levels and vibration.

Profitability

The R17Z-9A is designed to maximize profitability through improved efficiencies, enhanced service features and longer life components.

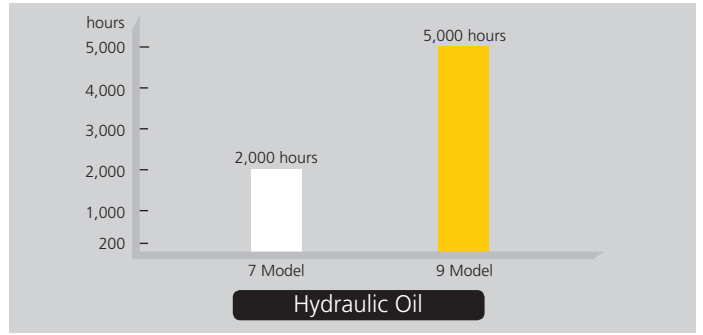

*Photo may include optional equipment.

Easy Access

The R17Z-9A was built with accessibility in mind. All covers and hoods were built for complete open access. Regular service and maintenance is easy and convenient with the R17Z-9A.

Extended the Life of Components

9A series excavators were designed with bushings designed for extended lube intervals (250 hrs) & polymer shims (wear resistant, noise reducing), extended-life hydraulic filters (1,000 hrs), long-life hydraulic oil (5,000 hrs), more efficient cooling systems and integrated preheating systems which extend service intervals, minimize operating costs and reduce machine down time.

Cooler Cleaning at Ease

The Square Wave Fin and the Corrugate Wave Fin to prevent clogging, were applied to the radiator and the oil cooler.

Centralized Grease Fittings

Centralized lubrication bank for faster, easier service and maintenance.

Two-Piece Hose for the Dozer Cylinder

Two piece hoses were applied for a better and easier maintenance.

Easier to Transport

Four tying-down holes allow easier transportation.

Protection Covers for Cylinders

The standard boom cylinder cover and the dozer cylinder cover was applied to protect cylinders from potential damages.
